

Structures in Nature – Outdoor Lesson Sheet

Find and draw the 5 plants we have studied, label your drawing with the main features that help the plants survive the Pacific Northwest climate.

Structures in Nature – Outdoor Lesson Sheet

Plant	Location, where did you find it?	How big is the plant and how does it affect it?	Does it have leaves? How do they help the plant?	Does it have seeds? How do the seeds spread?	What other characteristic helps the plant survive the Pacific Northwest?
Maple					
Douglas Fir					
Blackberry					
Fern					
Moss
